**DETAILED ACTION**

***35 USC § 112 and 35 USC § 101***

Claims 10-15 are rejected under 35 U.S.C. 101 because the claimed invention, sustainable, non surgical breast augmentation through cocoa butter and Vitamin E is not supported by either a credible asserted utility or a well established utility.

Applicant's assertion of specific credible utility is not considered credible. One of ordinary skill in the art would not find applicant's assertion of utility credible because applicant has not offered any statistically significant evidence to prove such.

Claims 10-15 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a credible asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention and would not find applicant's assertion of utility credible because applicant has not offered any statistically significant evidence to prove such as stated previously.

In addition, see MPEP 2107.03,

"affidavit evidence from experts in the art indicating that there is a reasonable expectation of success, supported by sound reasoning, usually should be sufficient to establish that such a utility is credible."

As such, Applicant has relied upon the Cayce reference to teach the use of cocoa butter to increase breast size. As increasing the breast size is the only breast treatment method disclosed by the Applicant, the claims will be interpreted in light of the specification. The only assertion is the closest prior art that contradict Applicant's allegation. See Cayce, page 285, line 8, "To Reduce Bust" continuing in lines 9-22 describing the use of cocoa butter massaged into the breast to reduce the size of the bust.

Art Unit: 3624

Therefore, the disclosed method of breast enlargement would not be accepted as obviously valid by one of ordinary skill in the art.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cayce.

Cayce discloses a method of treating a breast with cocoa butter but does not disclose the use of vitamin E. Vitamin E is commonly used to treat the skin, it is readily found in any body lotion for the skin, including the breast. It would have been obvious to one of ordinary skill in the art at the time of the invention to use Vitamin E and cocoa butter to treat the breast as both are well known for treating dry skin, including treating the nipple and breast when nursing.

***Response to Arguments***

Applicant's arguments filed 11-20-03 have been fully considered but they are not persuasive. Specifically, as to the arguments against the 35 USC 101 and 35 USC 112 first paragraph rejections, while the claims may not specifically recite that the claimed invention is sustainable, non surgical breast augmentation, this is the only disclosed treatment for the breast in the instant specification, as such, the claims are examined in light of the specification.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., Vitamin E for the purposes of retention of the cocoa butter) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
